

Sports Premium Review 2020-2021

Sports Premium spend in 2020-2021 was lower than normal due to the national lockdown (Jan- Mar) and strict rules which prevented us from having visitors into schools to run events and specialist teaching, which has left us with a carry forward into 2021-2022 of £9,600. Swimming lessons were booked for the summer term for year 2 which had to be cancelled.

As a result of the funding we have been able to improve the engagement of pupils, increase staff confidence, knowledge and skills and broaden experiences in a range of activities. The impact of the funding has been:

- Engagement of children in various different sports which has boosted their confidence, increased their movement and wellbeing after the winter lockdown.
- Through the Competition Package, our children have been able to represent the school in various different sports such as hockey, gymnastics, cross country and football.
- Specialist sports coaches have enabled pupils to participate in organised sport at lunchtimes
- Specialist sports teachers have allowed on going training for our staff as they watch and are coached by our sports teachers. This has a positive impact on staff as well as pupils.

The spending was split as follows

Income		£17,040
Expenditure		
Lunchtime Games with Sports Coaches	£1,590	
Specialist Sports Coaches	£4,641	
Competition Package at Queen's School	£824	
Equipment & supplies	£385	
Total Expenditure in Year		£7,440
Amount carried forward		£9,600
Carry forward driven by:		
Cancelled Swimming Lessons	£5,000	
Underspend on Sports Coaches due to lockdown for 8 weeks – and a delay in re-starting	£1,967	

The impact of the funding has been:

- A successful sports day with inter-house and year groups competitive activities.
- Improvement of play and engagement of children at lunch times with external sports coaches.
- The purchase of new playground equipment which has increased children's physical activity, supporting children's health and wellbeing.
- PE lessons by sports coach during pandemic remotely and in person for children at Key Worker School
- A physically engaging curriculum planned for return of children post second lockdown to get children active again – a notable difference in children's physical ability was a high priority to focus on.
